

Manual Testing Record

Project: Week 4 Mock Sprint – Team 23

Author: Rishi Sood – Developer 2

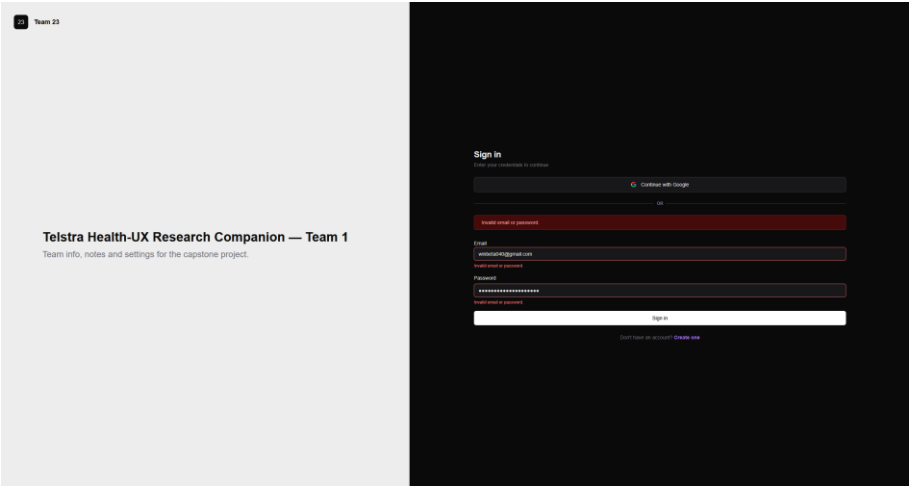

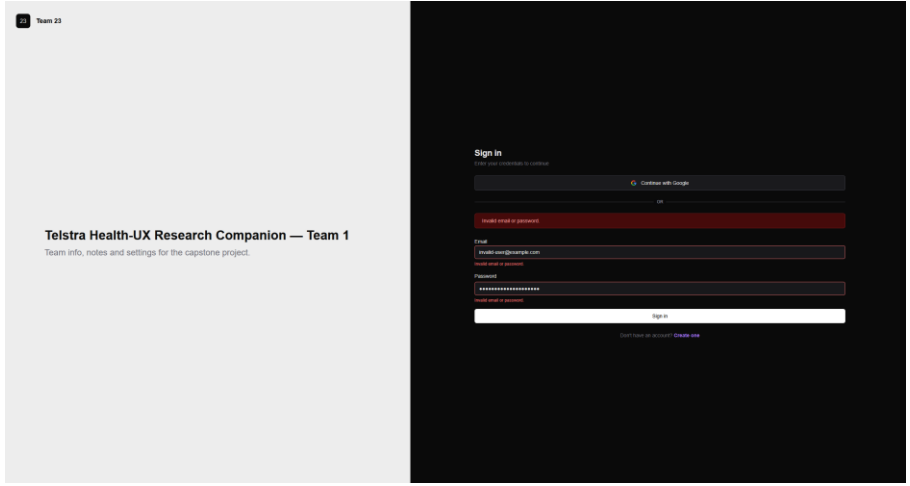

Date: 12 August 2026

Task: Test Login → Redirect → Team Page Flow

#	Step	Expected	Actual	Pass/Fail
1	Navigate to https://rmit-capstone-frontend.vercel.app/auth/signin	Sign-in form loads: Google button, "or" divider, email + password fields	As expected	Pass
2	Enter a valid account's email + password, submit	Toast "Signed in successfully"; brief loading state; navigates away from <code>/auth/signin</code>	As expected	Pass
3	Check final URL after redirect	Lands on https://rmit-capstone-frontend.vercel.app/teaminfo (not <code>/dashboard</code> or anywhere else)	As expected	Pass
4	Check the page header	Heading reads exactly "Team 23"; subtitle below it reads "The people behind Telstra Health - UX Research Companion"	As expected	Pass
5	Check the member-count badge (top right)	Reads "5 members"	As expected	Pass
6	Check each of the 5 real cards renders	Each should have a photo, name, role pill, and truncated blurb: - Vu Ngoc Chau (Project Manager) - Shehryar Shaukat (Business Analyst) - Andi Jagila (UX Designer) - Lam Manh Tuan (Developer 1) - Rishi Sood (Developer 2)	As expected	Pass
7	Confirm no stray content	No "Test Member" card, no "Role TBC" pill, no lorem ipsum text visible	As expected	Pass
8	Refresh the page while still signed in	Stays on <code>/teaminfo</code> , does not bounce to <code>/auth/signin</code> (confirms the session cookie survived)	As expected	Pass
9	Check grammar + punctuation	Grammar + punctuation has no mistakes in headings, subtitles, page names, and member cards.	As expected	Pass

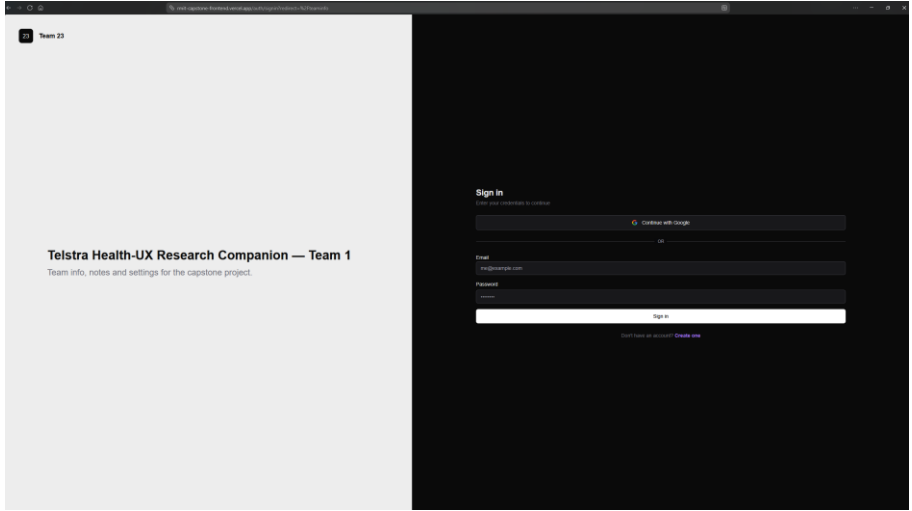

Task: Test Edge Cases & Log Bugs

T-01 — Invalid login rejected

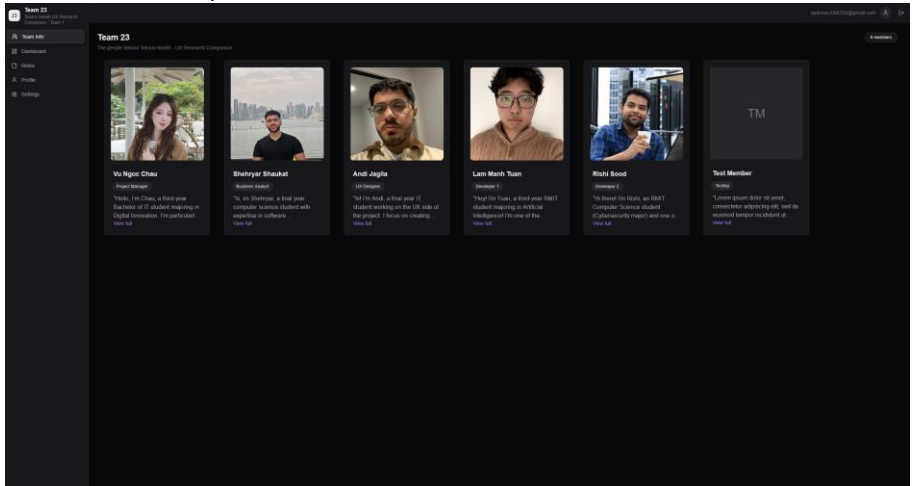

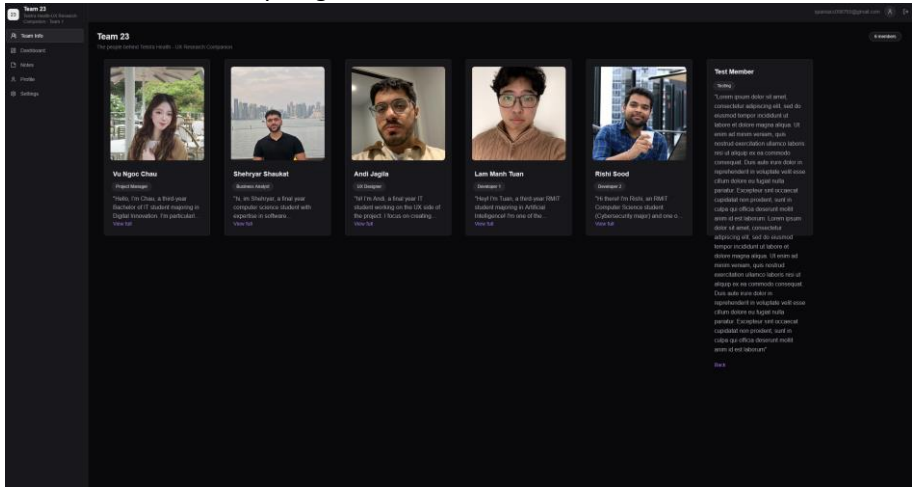

Test ID	T-01
Objective	Confirm the app rejects invalid credentials, shows a clear error, and grants no access or session.
Preconditions	App running and reachable; user logged out (no active session); at least one valid account exists for contrast.
Test steps	1. Go to the login page while logged out. 2. Enter a valid email with an incorrect password and submit. 3. Enter an email that does not exist with any password and submit. 4. Submit with empty email and/or password fields. 5. Submit malformed input, e.g. invalid email or whitespace-only.
Test data / inputs	Valid email + wrong password; non-existent email; empty fields.
Expected result	Each attempt is rejected. A clear, non-specific error is shown (does not reveal whether the username exists). User stays on the login page, no session/token is issued, and protected pages remain inaccessible.
Actual result	Valid email + wrong password:  Non-existent email: 

	Empty fields: Team 23 Telstra Health-UX Research Companion — Team 1 Team info, notes and settings for the capstone project. Sign in Enter your credentials to continue Continue with Google or Email info@telstra.com Please enter a valid email address Password ***** Password is required Sign in Don't have an account? Create one
Status	Pass Fail

T-02 — Direct team-page access without login redirects

Test ID	T-02
Objective	Confirm the route guard sends an unauthenticated user to login when they hit the team page URL directly.
Preconditions	User logged out; browser session/cookies cleared; the team-page route/URL is known.
Test steps	1. Ensure you are logged out (clear cookies/local storage or use a private window). 2. Paste the team-page URL (https://rmit-capstone-frontend.vercel.app/teaminfo) directly into the address bar and press Enter. 3. Observe where the app lands and whether any team content flashes before redirect.
Expected result	The app redirects to the login page. No team-page content is rendered or exposed. Access is only possible after a successful login.
Actual result	Redirect URL: https://rmit-capstone-frontend.vercel.app/auth/signin?redirect=%2Fteaminfo 
Status	Pass Fail

T-03 — Team-page edge cases: missing photo & long blurb

Test ID	T-03
Objective	Confirm the team page renders gracefully for a member with no photo and a member with an unusually long blurb.
Preconditions	Able to view or create team members with (a) no photo set and (b) a very long blurb.
Test steps	1. Missing photo: view a member record that has no photo. 2. Check member initials show as fallback. 3. Long blurb: view a member with an unusually long blurb. 4. Check the text wraps, truncates, or scrolls cleanly without overflowing the card or overlapping other elements.
Test data / inputs	One member with photo removed; one member with a very long blurb.
Expected result	Missing photo shows initials of team member. Long blurb is contained gracefully with no layout break, clipping, or horizontal overflow at desktop and narrow widths.
Actual result	One member with photo removed:  One member with a very long blurb: 

	Re-test: Bug ID – 01 
Status	Pass Fail
Notes/linked bug ID	Bug ID – 01

Bug log

Bug ID	Test ref	Summary	Steps to reproduce	Status
01	T-03	Long blurb clips out of team member flip card.	1. Log in. 2. Click “View full” on “Test Member” in “Team Info” page.	Resolved
