

Team Page & Login Styling Requirements

Project: Week 4 Mock Sprint - Team 23

Author: Shehryar Shaukat - Business Analyst

Refined by: Ngoc Chau Vu - Project Manager

Date: 10 August 2026

Overview:

The Team Page and login page requirements for the Week 4 mock sprint feature are outlined in this document. The goal is to give the development team and UX clear direction prior to implementation. The Team Page must show the necessary team data specified in the assignment, but the login scope is restricted to styling only.

Functional Requirements:

FR-01 - Team Name

The Team Page shall display the team's name clearly at the top of the page.

FR-02 - Team Member Photo

The Team Page shall display a photo for each team member.

FR-03 - Team Member Name

The Team Page shall display the full name of each team member.

FR-04 - Team Member Role

The Team Page shall show each team member's assigned role, such as Project Manager, Business Analyst, UX Designer, Developer 1, or Developer 2.

FR-05 - Team Member Blurb

The Team Page shall contain a brief introduction or blurb for each team member.

FR-06 - Consistent Member Layout

Each team member's information shall be presented in a consistent layout and style.

FR-07 - Login Page Styling

The existing login page shall be visually restyled to give a clear and uniform user experience.

FR-08 - Login Fields

The existing email and password input fields shall remain visible and usable following stylistic modifications.

FR-09 - Login Button

The existing Sign In button shall be plainly visible and consistently styled.

FR-10 - Existing Login Functionality

The existing authentication functionality (logic, validation, session handling) shall not be changed as part of this feature.

FR-11 - Successful Login Redirect

After successfully authenticating using the existing login functionality, the user shall be redirected to the Team Page.

FR-12 - Authenticated Access to Team Page

The Team Page shall only be accessible to an authenticated user.

Display and Validation Rules

DR-01: Team member photographs should be similar in size and shape.

DR-02: Team members' names and roles should be easily readable.

DR-03: Blurb content should be wrapped properly and not disrupt the layout.

DR-04: If member information is displayed on cards, each card should have uniform spacing, alignment, and design.

DR-05: Existing login validation messages must be visible and readable when the page is restyled.

DR-06: Styling modifications should not hinder users from inputting email or password information.

Edge Cases

EC-01 - Missing Photo

If a team member's photo is missing, a default placeholder image should be used.

EC-02 - Long Name

Long team member names should wrap or scale appropriately to avoid breaking the layout.

EC-03 - Long Blurb

A lengthy blurb should be viewable and not block other page elements.

EC-04 - Missing Role or Blurb

If role or blurb information is briefly unavailable, the remaining team member information should still be displayed properly.

EC-05 - Different Image Dimensions

Photos with varying initial dimensions should be shown consistently.

EC-06 - Login Error Messages

Login error or validation notifications should be legible even after stylistic modifications.

EC-07 - Direct Team Page Access

If an unauthenticated user attempts to access the Team Page directly, they should not be able to view the page and should be redirected according to the existing authentication behaviour.

Acceptance Criteria:

AC-01: The Team Page displays the team's name.

AC-02: Every team member has a visible photo, name, role, and brief description.

AC-03: Team member information follows a uniform visual layout.

AC-04: Long or missing text does not cause the Team Page layout to fail.

AC-05: The login page has been visually redesigned.

AC-06: Existing email and password fields are still functioning and readily visible.

AC-07: Existing login validation and error messages are still readable.

AC-08: The login styling effort did not include any changes to the authentication logic.

AC-09: A successful login redirects the user to the Team Page.

AC-10: The Team Page cannot be accessed directly without a valid login.
